

PEDROS®

Enjoying the ride since 1989

In 1989, the mountain biking boom gaining steam and brands such as Ringle, Paul's, SRP and Kooka could anodize anything in 3-D Violet and sell the crap out of them. 1989 was also the year Pedros started as a college company in Boston selling Syn Lube to east coast mountain bikers. It was the first time synthetic oil was introduced to bikers and people loved the product.

While Syn Lube is still in our product line, the company has developed the bike care and tool section to carry hundreds of items and we moved beyond USA east coast and sell Pedro's products in more than 30 countries around the world.

Our focus is bicycle maintenance and the way we go about it is to design products which we enjoy using ourselves. This means striving for top level quality and functionality. We control steel quality, tolerances, hardening and surface treatment and the warranty issues are for most extremely low. The bike care is based on Pedro's exclusive chemistry and we test our product with professional teams to ensure they work to the highest standard.

We all share a passion of maintaining bikes and the desire to make the best products to achieve this. This has over the last years resulted in many new products and more to come. As we grow, we will always treasure our heritage and passion for maintaining bikes and to be out there to work and have fun with other people who love to bike.

BIKE CARE

LUBE

Ice Wax 2.0 (617XXXX) Wax for dry conditions, keeps the chain clean, Road Biking **Go!** (6140031) Biodegradable lube for dry conditions, high viscosity for penetration, MTB in dry conditions. **ChainJ** (6110XXXX) Canola lube for mixed conditions and any type of biking, biodegradable. **Syn Lube** (601XXXX) super slippery synthetic lube for wet, cold muddy conditions. Endurance, MTB, winter cycling. **Bio Grease 2.0** (6195031) all purpose biodegradable grease. **White Grease** (6215031) high performance grease with teflon additive.
